

Our World is Beautiful by Hannah Straight (aged 10)

Our world is beautiful, under the trees, rivers and seas!

Wars and floods.

Our life is amazing.... really?

Livid lava bubbles dangerously, but we survive.

Intricate designs all over spectacular creatures like

Butterflies, bees with beautiful flights.

Exhilarating dragonflies spread their wings

As transfixing as the most luminous star in the solar system,

Under the gaze of the fascinating sun.

Terrible fates end and incredible life starts.

Failure is no punishment, just part of life.

Understand that life is lovely!
